AUTHOR GUIDELINES

- **GANIT** *Journal of the Bangladesh Mathematical Society* features selected contributions of pure and applied mathematics. The emphasis will be on the original research papers, but from time to time GANIT will publish expository papers or survey articles. All contributions are to be rigorous in nature and mathematical in treatment and should be written in English.
- **Manuscripts** should be submitted in **duplicate** to Associate Editor Dr. Laek Sazzad Andallah, Professor, Department of Mathematics, Jahangirnagar University, Savar, Dhaka-1342, Bangladesh along with a soft-copy in MS-WORD in single space via email: ganit.bms@gmail.com
 - All submissions to GANIT must be original, unpublished previously, and not submitted elsewhere and not under consideration for publication elsewhere.
 - Authors must ensure that contents of any submission are not held by the copyright of any other publication.
 - It is assumed that the submission is approved by all authors and the concerned authorities where the work was carried out.
 - It is the author's responsibility that any submission does not contain libelous or unlawful statements or in any way infringe the rights of others.
 - Copyrights for articles published in GANIT are retained by the authors, with first publication rights granted to GANIT as the work simultaneously licensed under a Creative Commons Attribution License that allows others to share the work with an acknowledgment of the work's authorship and initial publication in this journal.
- Authors are encouraged to provide a list of at least 3 (three) reviewers along with reviewer's Name, affiliation, email address.
- **Manuscripts** should be typed double spaced on one side of 8.5" × 11" inch or A4 size with one inch margin all around.
- All pages of the manuscript should be numbered. Page 1 should contain the article title, author and co-author names and affiliation(s). Any footnotes to the author(s) are to be placed at the bottom of page 1; page 2 should have a proposed running head (in abbreviated form of the title) of less than 40 characters.
- An **abstract** summarizing the main points of the article should be written on page 3 of the manuscript in font size 9. The abstract should not exceed 250 words.
- **Mathematical expressions** should be avoided in the title and abstract as far as practicable.
- References should be avoided in abstract.
- Footnotes in the text should be avoided. If they are essential, they should be numbered consecutively by superscript and placed at the end of the paper, before the list of references.

- All mathematical expressions should be typewritten, if possible. Equations should be numbered serially or section-wise and indicated in the right margin.
- Use of **Greek letters** as superscripts and subscripts should be avoided. Levels of subscripts and superscripts should be clearly maintained.
- Complicated fractions in the text should be written using solidus (/) or negative exponents.
- $e^{(\)}$ should be replaced by $\exp(\)$ where the expression in the parenthesis is complicated. Radical signs should also be replaced by fractional exponents as far as practicable.
- Clear distinction between upper and lower case letters, between ‘oh’ and ‘zero’, between ‘el’ and ‘one’, between ‘kay’ and ‘kappa’, ‘bhee’ and ‘nu’ etc. should be made.
- Authors are requested not to underline subheadings and mathematical symbols, as they will be automatically set in accordance with the style of the journal.
- **Diagrams** should be submitted as original line drawings on white drawing papers or tracing papers. Each diagram should be made on a separate sheet and numbered consecutively. **Lettering** and **data points** should be large enough so that when reduced to fit on the journal page they can be read with ease. **Legends** to diagrams should be typed on a separate sheet and attached at the end of the manuscript.
- **Tables** should be numbered consecutively, typed carefully on separate sheets in exact format desired and attached at the end of the manuscript. Table headings should be short but clearly descriptive.
- **References** should be listed in alphabetical order of surnames, at the end of the manuscript, as in the examples below:
 - [1] Cronin, J., Bifurcation of periodic solutions. *J. Math. Anal. Appl.* 68 (1979), 130-151
 - [2] Lee E. B. and Markus, L. Optimal control for nonlinear processes, *Arch. Rat. Mach. Anal* 8 (1961), 36-58.
 - [3] Timoshenko S. and Goodier, J. N. *Theory of Elasticity*, McGraw-Hill Book Co., New York, 1970.
- **References** should be cited in the text by the serial number from the above list placed between square brackets as [1], [2], etc.
- **Galley proofs** may be sent to the author, if necessary. In that case they should be returned within 48 hours of receipt with correction marks. No new material may be inserted in the text at the time of proof reading.
- **More information can be found from** <http://bdmathsociety.org/>
